DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1-3, 5, 9, 10, 13, 14, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Kohl. Kohl shows A method for combusting an organic waste concentrate, which contains alkali metal compounds (black liquor, fig. 1), under oxidative conditions for recovering said alkali metal compounds as alkali metal carbonates (col. 5, line 20-26), characterized in that the combustion is carried out at a temperature of at least 850C (col. 5, line 6), and the formed flue gases are cooled below a sticking temperature range of the alkali metal carbonates formed during the combustion by mixing a colder medium to the flue gases (col. 9, lines 30-32, black liquor), and simultaneously water is poured on the walls of a cooling zone at least at the sticking temperature range (col. 8, lines 37-40, fig. 2), whereby alkali metal carbonates formed during the combustion dissolve in water to form a recoverable aqueous solution (52, fig. 2), in that the combustion is carried out at a temperature ranging from 900 to 1250 C, which is controlled by the amount of combustion air (col. 5, line 6), in that the formed flue gases are cooled below 600 C by mixing water and/or air and/or colder flue gas to said formed flue gases (col. 9, lines 30-32), a waste concentrate having a solids content of at least about 25% by weight is combusted (col. 4, line 58), that the waste concentrate to be combusted is a spent liquor concentrate from impregnation and/or bleaching of mechanical or chemi-mechanical pulp (col. 1, lines 11-15).

Allowable Subject Matter

Claims 4, 6-8, 11-12, 15-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with respect to liquors in general: Landfors et al (5653861), Nilsson (6,062,547), Stigsson et al (5,814,189).
